

Designed to excel.

Bigmate's Intelligent GPS Monitoring Device is built for advanced IoT & M2M integration, giving you access to a wide range of applications with one single device.

Features:

- 📍 3G - UMTS/HSPA+: Dual band UMTS 850/1900MHz: High speed data transfer for faster communication and interaction for IoT M2M applications
- 📍 3-Axis accelerometer: Turn oversignal with instant acceleration monitoring as well as back log for crash condition history report
- 📍 Backup satellite communication capability: IRIDIUM network compatible with SATCOM accessory sold separately
- 📍 Water resistant IP65 suitable for all kinds of vehicles and mobile assets exposed to harsh weather conditions
- 📍 Anti-tamper functionality accurately detects when the device's case has been opened
- 📍 Easy CAN / OBD integration with external ECU monitor accessory
- 📍 Retrieve back or forward log messages to provide valuable data after a critical incident such as harsh braking condition, crash event with photo capturing functionalities
- 📍 Save up to 30,000 events when no GPRS or GSM network is available
- 📍 Built-in remote diagnostics to monitor the health of hardware components as well as efficiency of communication
- 📍 Intelligent geofencing capabilities (up to 100 circular and 50 polygonal)
- 📍 Ultra low power consumption during sleep mode (1mA)

Compatible with:

- 📍 Navigation dispatch and routing
- 📍 Fuel monitoring
- 📍 Driver ID
- 📍 Jamming detection
- 📍 Road assistance
- 📍 Temperature monitoring
- 📍 Camera
