

# Discover the Economical GPS Tracking Device

This is a value-based vehicle tracking device designed for easy installation and is an ideal solution for commercial and automotive monitor, track and trace applications. It features a small size, superior GPS performance, ultra low power sleep modes, 3-axis accelerometer for motion sense, and three inputs and three outputs (I/O).

## Features:

- 📍 Asset tracking
- 📍 Wired device with internal GPS and cellular antennas
- 📍 Telstra NextG compatible
- 📍 Tracks GPS-based speed, odometer reading and engine hours
- 📍 Flexible logging interval options
- 📍 3 digital inputs
- 📍 User-defined vehicle speeding alerts can be sent automatically via SMS and email
- 📍 Power Management and sleep modes

## Benefits:

- 📍 Ideal solution to provide remote security, asset allocation and tracking
- 📍 Built-in antenna for easy installation
- 📍 Inexpensive solution
- 📍 Full transparency to identify, plan and schedule maintenance
- 📍 Improved utilisation of fleet vehicles
